

5.9. Natural Climate Solutions Portfolio (South pole)

Project Name	Natural Climate Solutions Portfolio
Partner	
What is the project?	<p>Ecopetrol's portfolio of natural climate solutions is a voluntary program created to identify and promote the development of quality emission reduction projects. South Pole, as a technical partner, will support and accompany these projects for their successful execution and permanence in the long term. The program is open to involve different initiatives that are being carried out in the national territory.</p>
What are we looking for?	<p>We seek to identify initiatives along the national territory that want to join this great bet. The objective is to evaluate and guide these projects to develop an emission reduction project that channels additional resources to the corresponding mitigation activities, generating long-term alliances with stakeholders.</p>
SDGs to which it contributes	
SbN Social Challenge (IUCN)	 <p>Degradación ambiental y pérdida de biodiversidad</p> <p>Mitigación y adaptación al cambio climático</p>
Main Results	<ul style="list-style-type: none"> • The structuring of the operational plan of the contract was developed. • The consolidation of Ecopetrol's Natural Climate Solutions portfolio, through the identification of new initiatives that meet Ecopetrol's Decarbonization ambitions. • The evaluation of projects implemented by Ecopetrol in SNC, with the aim of identifying challenges and opportunities for them.
